

Twin SHEET Box

Examples of various systems

Twin SHEET Containers come in a variety of sizes designed for optimum loads in 53' trucks as well as shipping containers. Sleeves are made to custom heights and paired with the right pallet foot print to maximize your return and efficiency.

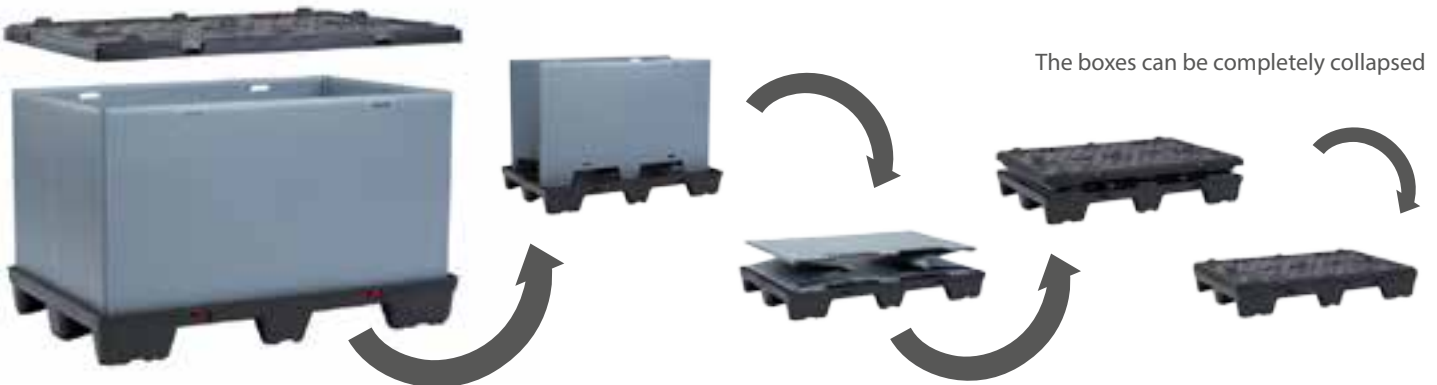

Our Twin SHEET Containers are made from a combination of a rigid Con-Pearl[®] sleeve and a durable Twin SHEET pallet and lid. The pallets and lids include slide locks that secure the system together to eliminate the need for stretch wrapping or banding. The systems are designed for safe stacking for transport and warehousing.

Characteristics of Con-Pearl[®]

- lightweight
- very strong
- customizable heights
- weather resistant
- 100% recyclable
- collapsible
- high return ratio

Con-Pearl[®] sleeves

Single piece pallet sleeve

Single piece pallet sleeves provide the highest load capacity and best handling features. The custom design ensures efficiency of the sleeve pack. Our different easy-folding systems allow optimal volume reduction. Return transport volume savings up to 80%. Easy to set up in less than 10 seconds!

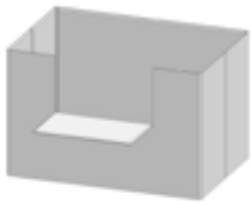

M-fold

Hinges on the short side allow the sleeve to fully collapse for optimal return and stacking.

Z-Fold

Hinges on the long side allow the sleeve to fully collapse for optimal return and stacking

Load door

The load door is especially suited for loading and unloading boxes with single piece pallet sleeves. These are available in many dimensions and types. Available with sealed edges at 600mm wide by 350mm deep, as well as our standard door at 850mm wide with customizable depths.

Multi-part pallet sleeves

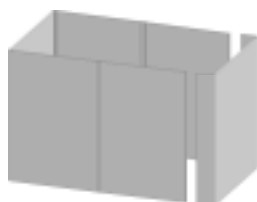

Multi-part pallet sleeves are perfect for easy loading and unloading of products. The main characteristics include simplified handling, process oriented configurations and volume reductions up to 80%. Multi-part box sleeves can be made in various configurations with an opening on the short side or on the long side to provide a custom solution for any application.
